Dominica Geothermal Risk Mitigation Project Contract

Subject: Bid Clarification 0016 – Reinjection pipe work

Bid Document Clause: Part 2 – Part 1, Section IV, Schedule 8

Detailed description of request

Please confirm that pipeline works as per Schedule 8 of the proposal will be a unit price base contract and will included the necessary pipe bridges and culverts.

Enclosures: None

Response:

The Contractors proposal shall include and allow for the Design, Supply and Installation of the Facilities as set out by the bidding documents, including the required pipe bridges and culverts. Bidders are free to propose alternatives to the concepts proposed in Part 2 (the suspension bridge, cliff bridge truss, etc) providing they fully meet the Employers Requirements set out in Part 2.

The bidding documents set out a BOM for the large bore pipe work of the reinjection pipeline from the general vicinity of WW-P1 to WW-01 and WW-R1. This does not include the requirements at WW-01 and WW-R1 wellpads; nor at the WW-P1 wellpad and between WW-P1 and the power generating units.

The reinjection pipeline system is a fixed price for the complete scope of the work. However, a facility has been provided for the adjustment of the price for the piping based on final measurement of the large components as set out in the BOM. Those unit rates as set out in Schedule 8 are to include all installation costs as well as allowances for any other miscellaneous items that will not be separately measured. For the avoidance of doubt, changes to the price for the pipeline works will be based only on those items listed in the BOM, drawing RZ042100-BM-DRG-0010.

Enclosures: None

This clarification does not require an Addendum to the Bid Document.
