

 Dominica Geothermal Development Company Limited <i>Powering a New Generation...</i>	Bid Clarification Request (In accordance with ITB 7.1)	Reference Number: RZ042100-PGG-COM-0038
Dominica Geothermal Risk Mitigation Project Contract		
Subject: Bid Clarification 0038 - Spoil Disposal and stockpiling		
Bid Document Clause: In accordance with ITB 7.1		
Detailed description of request Spoil Disposal and stockpiling: It is noted that the spoils from the excavation at the Laudat Power Plant is designated to be stockpiled in two locations. One is to be used for sound barrier for steam vent. If the Contractor desires to dispose some or all of the balance of the spoil for his convenience, is this allowed? Enclosures: None		
Response: The Employers Requirements describes the various noise, visual, landscaping and other impacts to the environment that are to be mitigated by the Contractor. These mitigation measures are required during the construction phase of the project as well as up to and including final performance testing. Noise, visual and other environmental impacts may become apparent only once the Plant is in commercial operation and additional mitigation measures may be required at that time under the Contract. The Employer may also require spoil to be used for future mitigation purposes beyond the scope of the Contract. It is the Contractor's responsibility to manage the stockpiling of spoil on Site. Any excess spoil removal from Site shall only be permitted with the approval of the Employer.		
Enclosures: None
